Metro-s®

Adding Value to Water Since 1960

LUXURY IN POLYCHROME
PRODUCT CATALOGUE

Metro[®] welcomes you to the home of Premium Bath Fittings & Faucets.

The New Product Catalogue is a selection of our most prominent models, showcasing a range of design meets functionality for modern-day living. Whatever the design, all our products are made using high quality materials and finishes.

Located in the Capital of India, New Delhi, our manufacturing facility houses a team of experienced craftsmen along the various stages of in-house production.

We are the first manufacturer in India to get a Bureau of Indian Standards (BIS) certification for copper alloy bathroom fittings (ISI 8931/1993) along with URS and UKAS, among other certifications.

Founded with a vision to innovate and cater to a growing need for home-grown bathroom fittings in India's young markets, Metro-s was setup by Mr. Swaran Singh Jass in 1960. The brand, having evolved through the decades into a hub of luxury bathroom fittings and faucets, still stands firm on its founding vision. Established under limited resources with feeble technological means of the day, the company thrived as a result of sheer ingenuity and dedication of the workforce - a trait that continues to endure!

Renowned as a place for constant innovation and enterprise in its field, the company - now in its 3rd generation of operation - is proud of its role in shaping the Bathroom Fittings Industry in India.

Through the Years

Metro-s®
Adding Value to Water Since 1960

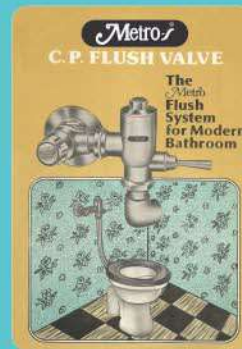

1960's

First Manufacturing Unit is set up in New Delhi. Production begins with high quality Gate Valves after which the company expands to full turn nickel-chrome plated taps.

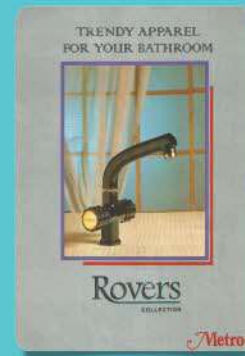

1970's

Expanding its scope of manufacturing, Metro-s introduces a complete range of premium bathroom fittings based on its revolutionary Full Turn Internal fitting; the iconic Deluxe handle hits the markets.

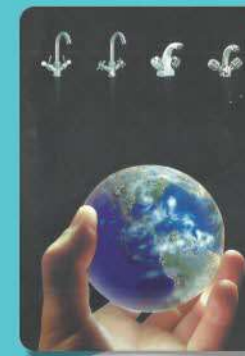

1980's

Metro-s introduces a sophisticated flush system for the modern Indian bathroom.

1990's

Using Ceramic Disc Fittings, the company pioneers and begins manufacturing Single Levers and Quarter Turns faucets in a variety of coloured finishes

2000's

The brand answers the urgent call of consumerism by incorporating a more contemporary design language; an approach that has since become synonymous with the brand's image.

2010's

Buoyed by the celebrations of its 50th founding Anniversary, Metro-s continues to grow as a trusted name in Indian as well as International Markets with over 250 products in its product catalogue.

2020's

New models Hector & Mist are added. Facing a world pandemic, the company is prompt in introducing faucets like foot-operated valves, touch-less options, among others.

Metro-s®
Adding Value to Water Since 1960

The Metro-s[®] Promise

Quality

At Metro-s our approach towards manufacturing a faucet is broadly a two-fold process:

The first is at the internal level. Even though this stage of design remains invisible to the finished product, there is a lot that goes into making a faucet durable. From designing to using high grade fittings, we adhere to stringent quality standards in making sure that every faucet we make is internally robust.

The company seeks to strike a balance between importing solutions from abroad and developing technologies in the domestic industry, without compromising on quality.

Refresh. Rejuvenate. Renew. Everyday

"Rejuvenate Your Senses"

As our founder once put it "We are in the Business of rejuvenating people"! We aim to create experiences that alleviate the senses and leave you refreshed. Our main objective is to provide you with the right 'interface' for enjoying water in a manner that is most desirable. Through designs that are both aesthetically appealing & easy to use, we try to move forward with your experience in mind.

"Chain of Welfare"

The company is deeply committed to the welfare of everyone associated with it. From the skilled workforce, to the management, to the market chain, the company has been working diligently to maintain the 'chain of welfare' at every level. Also, the company has maintained and strives to maintain an atmosphere of professionalism in the manufacturing sector.

"Respect the Environment"

Being in Business since 1960, the company fully understands the importance of a sustainable model for the Environment. As manufacturers dealing with metals, we are in Business of adding value to a natural resource! We therefore take it as our responsibility to work towards a sustainable model for a Greener Future.

Design

"Internal Performance +

External Appeal = Good Design"

The second design process we engage in deals with the external features. We aim to create designs that are not only easy to operate but also enhance the ambience of your private space, so that every time you use a Metro-s faucet **you feel refreshed!**

Our fleet of designs has been carefully crafted to amalgamate a fusion of the old and new. The product range exhibits our endeavor to present the charm of vintage design gracefully while swiftly showcasing contemporary aesthetic.

Service

The company acknowledges the importance of the Industry it is a part of and takes it as its responsibility to cater to a wide customer base. Renowned as a company for constant innovation in the field, we are driven by our long standing motto - 'Excellence in Production'.

Providing great service to the customer is of paramount importance to us, and we are constantly striving to understand the needs of our Dynamic Market Base.
